

# New To Our Pressureless Lineup

**PLA150-M VLCE**

Our new PLA150-M VLCE allows the use of an external signal line for easier installation or internal signal lines to reduce the risk of signal line damage. Featuring rollover protection, easy shut-off level adjustment, and a new more buoyant and reliable float our new pressureless level control is our most durable and reliable model.

**R150-TL70**

Our new 70mm twist-lock receiver allows the use of Fast Fill Systems PLA150-M SV Pressureless Shut-off valve and R150CV Fuel Receiver Check valve with 70 mm twist-lock style fuel nozzles.
