

# Vent & Breather Check Valves

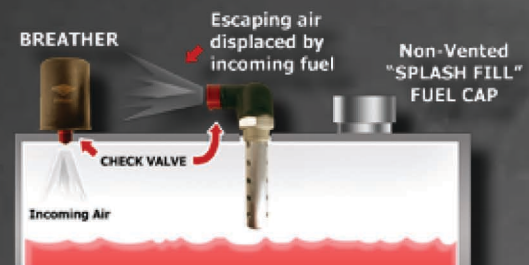

Vent with  
Check Valve:  
V150H-CKV

Breather Check Valve:  
FFV150-BCKV

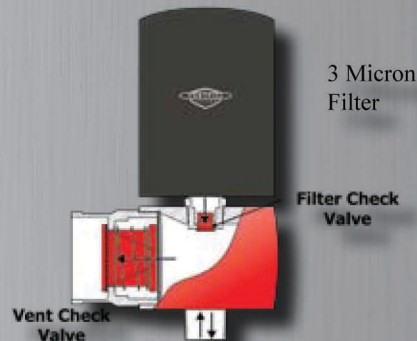

3/4" NPT  
Other options available

- ▶ Vent Assembly (2" NPT) has a one-way check valve on air discharge which allows venting over 300 GPM diesel fueling rate and prevents air from entering tank through the vent opening.
- ▶ Only filtered air (recommended 3 Micron) is allowed into the diesel fuel tank, check valve on breather filter prevents diesel fuel contacting the filter media.
- ▶ All-metal construction.

## FFV150 Remote Mount Filter Vent

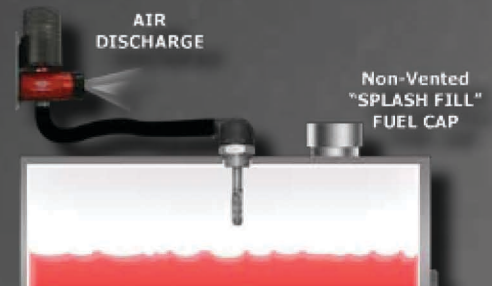

- ▶ Low profile for variable placement
- ▶ Only 8" inches in height
- ▶ Universal mounting bracket for easy installation

## New FFV150-HV High Volume Filter Vent

- ▶ Ideal for large storage tanks
- ▶ Enlarged Filter Check Valve

## FFV150-VB1

- Filter Vent with vacuum break and for use with desiccant filter (Filter not included)
- ▶ Improves the life of your current desiccant filters
